SPACER FABRIC

THE PROPERTIES OF IRUFA SPACER FABRIC :

3D Breathable

Air Chusion Effect

Medical Grade
Compression

Latex Free

Moisture Wicking

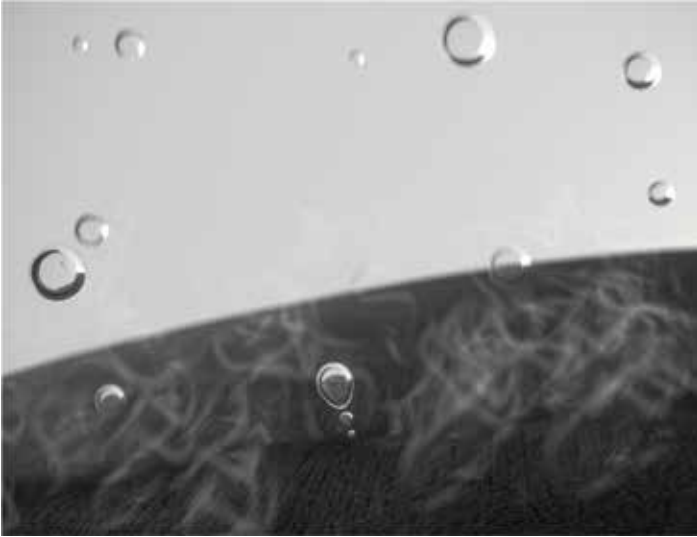

Light Weight

Machine Washable

24 Hours Use

3D BREATHABLE

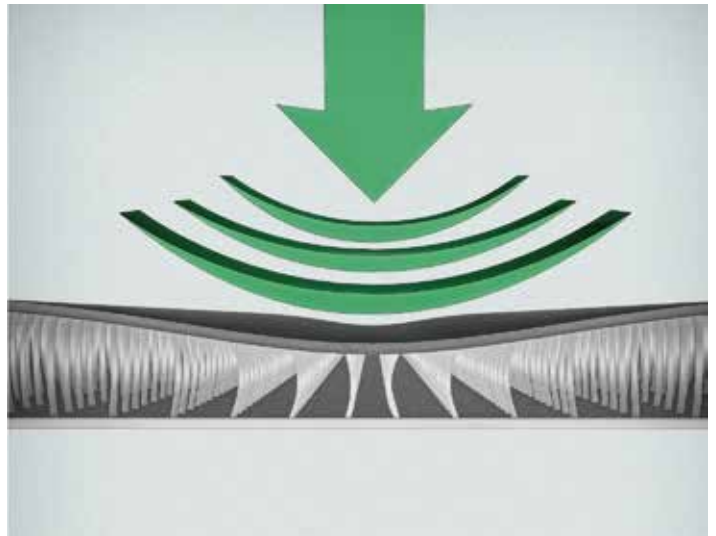

QUICK DRY

IRUFA Spacer Fabric is 3D knitted Structure which helps to create more spaces and causes capillary effect. The inner layer of Spacer Fabric can quickly absorb sweat. It helps the sweat evaporate rapidly by relying on the body's core temperature. Say-goodbye forever to feeling like you're wrapped in plastic when exercising.

AIR CUSHION EFFECT

REDUCE PRESSURE

Spacer Fabric is 3D knitted structure which is filled with air inside to help pressure redistribution and vibration reduction. We called this characteristic of Spacer Fabric "Air Cushion Effect". Air cushion effect of Spacer Fabric can both protect users to avoid the sport injuries and feel more comfortable.

ANTI-PILLING FABRIC

DURABLE FOR USE

The top layer of Spacer Fabric is featured with Anti-Pilling properties. Our Spacer Fabric is durable to use which helps prevent the formation of small knots or fibers caused by velcro strap. The Anti-Pilling treatment helps extend the lifespan of IRUFA medical support and improve their durability.

I **TOE BRACE**

Protect and Stabilize
your Toe

TOE-SF-21

Wraps for Broken Toes

Suitable for

- Broken toes
- Hammer toes
- Mallet toes
- Toe sprains or strains

Product Description

- The TOE-SF-21 toe brace is made from Spacer Fabric, offering support and alignment for injured toes. It gently immobilizes the affected toe by utilizing a neighboring toe for stability, ensuring proper positioning. Ideal for small fractures, excluding the big or pinky toe, it also protects hammer toes during healing.

Colors: Black 

Material: Spacer Fabric

Size: One Size

FT-SI-01

Toe Separator Silicone

Suitable for

- Overlapping or pinched toes
- Toe alignment support
- Bunion discomfort

Product Description

- The FT-SI-01 toe Separator Silicone is anatomically designed to gently spread the toes, absorb pressure, and promote proper alignment. It helps reduce friction caused by overlapping or pinched toes, easing discomfort and irritation. Ideal for relieving bunion pain, soreness from soft corns, and preventing toes from rubbing together.

KN-OS-08

Knee Wrap with Open Patella

Suitable for

- Osteoarthritis
- Patella tendonitis
- ACL
- MCL

Product Description

- The KN-OS-08 knee brace, made from Spacer Fabric, features an open-patella wrap-around design with a circular pad for stabilization. It has three adjustable straps: one above the knee, one below, and one at the back of the knee with a cutout for improved comfort and flexibility. Reinforced with spiral stays on both sides, this brace provides a secure fit and reliable support for daily activities.

Colors: Black 

Material: Spacer Fabric

Protect and Stabilize

LH-SF-11

Limb Holder

Suitable for

- Post-surgery recovery
- Restlessness or agitation in patients
- During medical procedures that require controlled limb movement

Product Description

- The IRUFA Restraint Limb Holder immobilizes a patient's limbs to prevent unwanted movement. Made with air-cushioned Spacer Fabric, it ensures comfort, breathability, and secure fastening. Designed to enhance patient safety, it complements proper nursing care.

Colors: Black 

Material: Spacer Fabric

Size: One Size

Heel-SF-22

Elbow and Heel Protector

Suitable for

- Bedridden patients with limited mobility
- Prevention of decubitus ulcers (pressure sores)
- Patients with conditions that cause prolonged immobility
- Post-surgery recovery for patients at risk of skin breakdown

Product Description

- The Heel-SF-22 Heel & Elbow Protector helps prevent decubitus ulcers in the elbow and heel using air-cushioned Spacer Fabric. It is ideal for patients with limited mobility who are at risk of skin breakdown and friction burns, allowing them to stay active or sleep comfortably.

Colors: Black

Size: One Size

AS-SF-11

Arm Sling

Suitable for

- Arm or wrist fractures
- Post-surgical recovery

Product Description

- The AS-SF-11 arm sling is designed to support the arm during recovery. Made from breathable Spacer Fabric, it offers soft, lightweight comfort for all-day wear. Easy to apply and secure, it helps immobilize the arm while allowing rest and healing.

Colors: Black 

Material: Spacer Fabric

Size: One Size

ARM-FM-11

Resting Hand Splint

Suitable for

- Stroke hand
- Neurological conditions
- Contracture prevention
- Post-operative hand positioning

Product Description

- The ARM-FM-11 resting hand splint supports the wrist, palm, and fingers in a natural position. Its contoured design promotes alignment and reduces muscle tightness. Adjustable straps ensure a secure fit, while the open-finger design allows ventilation and easy inspection. Soft padding provides lasting comfort.

Colors: Black

Material: Foam

Size: One Size

SHOE-CC-01

Post-Op Shoe

Suitable for

- Post-operative foot protection
- Toe or forefoot injuries
- Healing after bunion or hammertoe procedures

Product Description

- This SHOE-CC-01 post-operative shoe offers protection and support after foot surgery or injury. The rigid sole helps reduce pressure while walking, while adjustable straps ensure a secure fit. Its open-toe design allows ventilation and accommodates bandages.
